

## INFO 343 Journal

### Project #1: Promo

10/12

Session start - 6:55 pm

- Plan
  - Work on HTML now, CSS and bootstrap elements later. Also brainstorm possible designs for my online portfolio.
  - Using past exercises and work from CSE 154 to guide my page being coded from scratch.

Session end- 9 pm

10/14

Session start-2pm

- Biggest problem: trying to figure out how to apply opacity to a background image
  - Scrapped that idea. Couldn't figure it out.

Session end-6pm

End- 9pm

10/15

Session start-2pm

- Trying to figure out how to apply the overlay with text box hover effect
  - Solution: included my project image as an <img> instead of background image to the div
- Linking my my second html page named as a local path doesn't seem to work..
  - Solution: Wrong file name. lol.
- Exercise 2 problem 3 was particularly useful for the Skip to Main Content requirement
- Testing VoiceOver and Skip to Content link - Voice Over skips over my jumbotron's lead paragraph
- Decided to go with a standard flow of content on my second page because readability is the most important for its purpose.
- Using a late day. Cleaning up code and making sure it validates.

session end - 12am
